Work Experience

128 Technologies

Islamabad, Pakistan

Frontend Developer

Jun 2023 - Sep 2023

- Collaborated with designers to create clean interfaces, enhancing user experience and ensuring design consistency across web applications
- Developed responsive web applications using Tailwind CSS and ReactJS, leveraging CSS Grid for layout, resulting in improved performance and user engagement.

Projects

[Rapid Kurier GmbH ↗](#)

- Developed a courier website using React and Tailwind with multilingual support for a German-based client.

[Adopt Me ↗](#)

- Developed a responsive pet adoption platform using React, Vite, and Tailwind CSS, integrating API data for animal details with state management and hooks like useEffect. Ensured code quality using ESLint, Prettier.

[Finsys ↗](#)

- Created a website for Finsys using HTML, CSS, and JavaScript and a responsive layout using media queries.

[Personal Portfolio Website ↗](#)

- To showcase projects, skills, experiences and contact details. Developed using React and Tailwind.
